

## University of Queensland Ultraviolet Research Data Archive

This archive collection consists of a series of Summary Data Record Sheets and data tape printouts capturing observations of Eurythemal Ultra-Violet Light made by Dr D F Robertson from 1962-1970. These observations were made at Townsville, Cloncurry, Brisbane, Melbourne, and Goroka (PNG) using a UV-B recorder developed by Dr Robertson

*Archive Location: 496 - 497L*

### **Detailed Listing:**

Records are arranged by place of recording and then chronologically.
