

## L.J. Freer, Willis Island Archive

Freer, an architect practising in Townsville instructed by the Townsville Divisional Works Officer, Department of Works and Housing in 1948, to inspect the Willis Island Radio/Meteorological Station to determine the requirements for its good repair.

This collection includes correspondence, clippings and photographs relating to that task. The photographs have been copied and included in the University's collection of historic photographs.

***Archive Location: 141L***
